EMR and Practice Management Improvements

EMR Every Step Conference, Toronto, ON

Faculty / Presenter Disclosure

- **Faculty:** Peter Hamer– Executive Director, Ottawa Valley FHT
- **Relationships with commercial interests:**
 - No relationships with commercial interests

Disclosure of Commercial Support

- This program has not received financial support or in-kind support from any organization
- **Potential for conflict(s) of interest:**
 - Peter Hamer has not received payment or funding from any organization supporting this program AND/OR organization whose product(s) are being discussed in this program.

Mitigating Potential Bias

- There are no potential sources of bias.

Ottawa Valley Family Health Team

- Located in Almonte – A rural town 30 minutes west of Ottawa
- 13 family physicians, 1 paediatrician, 2 OB/GYNE
- 12,000 patients
- FHT/FHO combined in a 12,800 sq. ft. clinic adjacent to the local hospital

- Ways to improve practice management using the capabilities of your EMR:
 - Communication
 - Document management
 - Forms/templates

- Communication with patients:
 - Email
 - Patient Privacy
 - Policy
 - Portals
 - EMR function VS. add on software
 - EMR function
 - Appointments
 - Results

- Communication with patients:
 - External Software:
 - New patient forms
 - PHQ, GAD
 - Nippissing Development Screening
 - Patient Surveys
 - Messages and test results (New)

Document Management - Outgoing

- Nothing gets printed (well, almost nothing):
 - Rx faxed to pharmacy
 - Most pharmacies accept this
 - Requires naming conventions in address book
 - Rx renewals – managed through EMR vs. paper
 - Electronic faxes are logged and messaged if failed
 - Forms – printed at reception

Health Report Manager (HRM):

- Initial set-up was time consuming
- *Significant* time saving – eliminates scanning process
- Less errors attaching report to patient chart
- Reports come in text format (most)
 - Improves ability to search
 - No longer need to create OCR document
- Faster reporting time
 - Reports often in EMR same day they are created

Forms and Templates

- Prefill information
 - Patient demographics
 - CPP (Rx, allergies etc.)
- Complex form grouping:
 - Prenatal package
 - Antenatal I & II
 - IPS I & II
 - IPS BW I & II
 - Public Health Req.
 - IPS U/S
 - Dating U/S
 - Morphology U/S
 - Patient handouts
 - Billing Options
- Requires naming conventions

- Considerations:
 - Don't prefill positives or negatives that allow you to tab through without your input
 - Naming conventions

Thank you!
