Abstract Title: *	Medical Apps for Physicians and patients
Learning Objectives: *	1 What apps to recommend to patients and what to be careful of. 2What apps are useful to use in practice 3Share apps that other doctors will find useful

Abstract: *

This is originally 40 min talk reviewing the latest health apps that are available with a 15 min session where participants can bring their apps to show everyone. I usually have two screens going with one attached to my iPhone and one for my presentation.

I am happy to do this talk at a concurrent or panel. This is useful to all but may be better for those who are beginning to intermediate.

I will send my presentation to Darren Larsen to look at.

Thanks

Chandi
