- ✓ ONE® Mail
- ✓ Privacy & Security Training Module

What is the ConnectingOntario ClinicalViewer Bundle?

Physicians and their staff want access to digital health services to enhance patient care and prefer a streamlined approach. OntarioMD is making it easier for clinicians to enroll in and adopt health services by bundling them. One example of how we do this is the ConnectingOntario ClinicalViewer Bundle. Through this bundle, you get access to four different digital health services: **ONE® ID**, **ConnectingOntario ClinicalViewer**, **ONE® Mail** and the **Privacy & Security Training Module***. OntarioMD's Practice Advisors are available locally to help simplify the enrollment process for clinicians.

**More details about each service are available on the other side of this page.*

How can you get the ConnectingOntario ClinicalViewer Bundle?

1. If you are a community-based physician, nurse practitioner or a clinic administrator in **LHINs 5 to 14**, please email support@ontariomd.com.
2. An OntarioMD Practice Advisor will meet with you to review the process and the required steps.
3. Once all requirements are complete and you have access to the service, we will ensure you have appropriate training. For more information on the bundled services, visit ontariomd.ca.

Services in the Bundle provide clinical value:

"The ConnectingOntario ClinicalViewer provides access to critical information for my patients, easily and reliably. I can quickly get the information I need to care for my patients."

- Dr. Therese Hodgson, Family Physician

Products	What is it?	Why you need it?
ONE® ID <i>(an eHealth Ontario service)</i>	Credentials to access provincial digital health assets using one username and one password.	<ul style="list-style-type: none"> - Secure access to multiple digital health services - One username and password to access multiple services
